Superstore Sales Report

RECOMMENDATION

- **Fix Furniture's profitability.** Furniture earns $742K in sales but only $18.5K in profit (about 2.5% margin), against about 17% for Technology and Office Supplies. Review its pricing, discounts, and supplier costs.
- **Invest in Technology.** It is the top category in both sales ($836K) and profit ($145K).
- **Act on loss-making products.** Several products lose money, led by the Cubify CubeX 3D printers, the Lexmark MX611dhe printer, and several conference and round tables. Reprice, renegotiate, or discontinue them.
- **Protect top performers.** The Canon imageCLASS 2200 copier alone earns about $25K in profit. Keep it well stocked and promoted.
- **Plan around the seasonal peak.** Sales rise from September to December, so build inventory and campaigns ahead of Q4.
- **Grow Home Office.** It contributes only 18.7% of revenue, so it has the most room to grow. Consumer (50.56%) and Corporate (30.74%) should be retained.
- **Support the South.** It has the lowest sales of the four regions. Consider targeted promotions there.
